⁷ See Exhibit 5 schedules.

12. As presently advised, since August 22, 2003, CQRCert LLC has sought and continues to seek capitalization and funding.

13. Since August 22, 2003, CQRCert LLC has undertaken evaluations of the intellectual property assets, which evaluations included estimating the costs of maintaining patent applications and patents in numerous jurisdictions and identification of potentially revivable applications and patents.

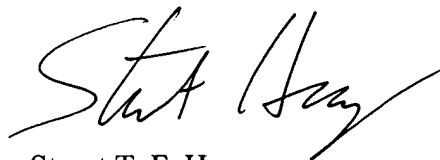

14. On February 17, 2004, CQRCert LLC arrived at what is believed to be a final set of patents and applications to be pursued.

15. This declaration and the attached Petition is executed as of February 18, 2004.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

1. Claims 1-11 remain rejected under 35 U.S.C. 102(a) as being anticipated by Gennaro et al.(Robust Threshold DSS Signatures).

In claim 1, Gennaro disclose computing shared values over a known and agreed context, each value being known by each member of a distinct subset of the plurality of distributed electronic devices and at each of a plurality of the distributed electronic devices, generating a random value using said shared values in (pages 351-356 and 362-363). Gennaro disclose at each of a plurality of the distributed electronic devices, generating a partial result for the distributed cryptographic computation using at least one of random values and computing a final result for the distributed cryptographic computation using partial results in (page 365).

In claim 2, Gennaro discloses the method of distributed cryptographic computation as recited by claim 1, wherein shared values are random keys in (pages 361-368).

Art Unit: 2131

In claim 3, Gennaro discloses the method of distributed cryptographic computation as recited by claim 1, wherein shared values are derived from a cryptographic protocol in (page 365).

In claim 4, Gennaro discloses the method of distributed cryptographic computation as recited by claim 1, wherein shared values are derived cryptographically in (page 361-368).

In claim 5, Gennaro discloses the method of distributed cryptographic computation as recited by claim 1, comprising the step of implementing a re-representation of a function in (page 362).

In claim 6, Gennaro discloses the method of distributed cryptographic computation as recited by claim 1, wherein said partial results may include incorrect values in (page 354 and 364).

In claim 7, Gennaro discloses the method of distributed cryptographic computation as recited by claim 1, wherein steps of claim 1 are performed iteratively in (page 365).

In claim 8, Gennaro discloses the method of distributed cryptographic computation as recited by claim 7, comprising changing shared values after step of generating an output based on partial result in (pages 355-356).

In claim 9, Gennaro discloses the method of distributed cryptographic computation as recited by claim 3, wherein cryptographic protocol is a cryptographic function involving exponentiation in (pages 356 and 365).

In claim 10, Gennaro discloses the method of distributed cryptographic computation as recited by claim 3, wherein cryptographic protocol is an RSA function in (pages 356 and 365).

Art Unit: 2131

In claim 11, it is inherent to have a hardware/computing device in Gennaro to store data in order to carry out a cryptographic computation.

2. Claims 1-4 and 9-12,17-31 remain rejected under 35 U.S.C. 102(e) as being anticipated by Brickell(US 5,867,578).

In claim 1, Brickell disclose computing shared values over a known and agreed context, each value being shared among a distinct subset of the plurality of distributed electronic devices and at each of a plurality of the distributed electronic devices, generating a random value using said shared values in (col.3, lines 66-67, col.4, lines 1-20). Brickell disclose at each of a plurality of the distributed electronic devices, generating a partial result for the distributed cryptographic computation using at least one of random values and computing a final result for the distributed cryptographic computation using partial results in (col.9, line 10-col.10, line 31,col.11, lines 10-65).

In claim 2, Brickell discloses the method of distributed cryptographic computation as recited by claim 1, wherein shared values are random keys in (col.9, lines 34-46).

In claim 3, Brickell discloses the method of distributed cryptographic computation as recited by claim 1, wherein shared values are derived from a cryptographic protocol in (col.9, lines 10-65,col.10, lines 1-10).

In claim 4, Brickell discloses the method of distributed cryptographic computation as recited by claim 1, wherein shared values are derived cryptographically in (col.9, lines 10-65,col.10, lines 1-10).

Art Unit: 2131

In claim 9, Brickell discloses the method of distributed cryptographic computation as recited by claim 3, wherein cryptographic protocol is a cryptographic function involving exponentiation in (col.9, line 10-col.10, line 31).

In claim 10, Brickell discloses the method of distributed cryptographic computation as recited by claim 3, wherein cryptographic protocol is an RSA function in (col.10, lines 52-53).

In claim 11, Brickell discloses the method of distributed cryptographic computation as recited by claim 1, wherein shared values are stored in a hardware device in at least one of distributed electronic devices in (col.7, lines 49-67, col.8, lines 1-14).

In claim 12, Brickell discloses selecting a subgroup of devices to perform the distributed cryptographic communication and computing shared values over a known and agreed context, each value being shared among a distinct subset of the subgroup of distributed electronic devices in (fig.1, col.14, lines 9-64). Brickell discloses generating a random value using shared values at each distributed electronic devices and generating a partial result for the cryptographic computation using a share of the cryptographic value and at least one of random values and computing a final result for the distributed cryptographic computation using partial results in (col.3, lines 66-67, col.4, lines 1-20; col.9, line 10-col.10, line 31, col.11, lines 10-65).

In claims 17-22, Brickell discloses the computed shared value is shared among a subset of the distributed electronic devices in (fig.1, col.14, lines 29-67).

In claim 23, Brickell disclose wherein the random values depend upon the particular set of devices selected for the subgroup in (fig.1 and col.9, lines 11-30).

Art Unit: 2131

Response to Applicant's Arguments

3. Applicant has amended Claim 1.
4. The rejections of the previous action are maintained.
5. Applicant's arguments filed 8/09/02 have been fully considered but they are not persuasive.

Art Unit: 2131

Applicant has argued that Gennaro does not disclose such a sharing of sources of randomness for use in computing and sharing of Gennaro is the sharing of a secret key in the form of values related to but different from the key. Applicant further argues that none of the group members individually possesses sufficient information to know the key. *In response:* the examiner disagree. Gennaro discloses that secret random value is jointly generated and shared by the members using Feldman's VSS protocol (see page 364) and Gennaro in page 360 teaches defining or deriving a secret value or key using the shared values. *Applicant has argued that* shared value of the embodiment of Fig.1 of applicant's invention is used to index a pseudo random function to generate values useful for detecting misbehaving members of the group and Gennaro is silent on these features. *In response:* please point out in the claim where applicant is claiming such a feature where shared values are used to index a pseudo random function to generate values useful for detecting misbehaving members of the group.

Conclusion

6 **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2131

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

OFFICE OF PETITIONS

**ORDER, PURSUANT TO, INTER ALIA, 11 U.S.C. §§ 105, 363 AND 365
APPROVING THE SALE OF CERTAIN ASSETS AND RELATED RELIEF**

Upon the Motion (the "Sale Motion") of CertCo Inc. ("CertCo"), a Delaware corporation, as debtor and debtor-in-possession (the "Debtor"), by its attorneys, Hahn & Hessen LLP, for entry of an order

1. approving, authorizing, empowering and directing, pursuant to sections 105, 363(b), (f) and (m), and 365 of the Bankruptcy Code and Bankruptcy Rules 2002 and 6004, the Debtor's sale and assignment at an auction sale (the "Auction Sale") held on March 25, 2003 at 11:00 a.m., of the following assets (the "Acquired Assets"):

- (i) all intellectual property belonging to CertCo, including patents, patent applications and trademarks, as more fully identified in Exhibit "A" attached hereto.
- (ii) all software developed by CertCo, including its Certificate Authority Software, Warranty Manager Application, CertSigner (CS) version 1.0 Application, CertValidator (CV) version 3.0 Application, CertValidator Software and RMX Software Services Application;
- (iii) pursuant to § 365 of the Bankruptcy Code, the right, but not the obligation, to assume, at the Closing, a certain License and Development Agreement by and between CertCo, Inc. and Identrus LLC, annexed to the Sale Motion as Exhibit "C." Cure obligations, if any, resulting from such assumption will be resolved at the sale hearing, or sufficient funds will be escrowed to deal with

claims relating to said obligations; and

- (iv) all other tangible and intangible assets belonging to CertCo without limitation, including all equipment, source and object codes, all related documentation and registered trademarks;

2. Authorizing and directing that the Acquired Assets be sold free and clear of any and all interests, liens, claims and encumbrances, at the Auction sale with any such interests, liens, claims and encumbrances to attach to the net proceeds of sale, which sale proceeds, unless an objection is received on or before the date of the hearing on the Motion and sustained at the hearing, shall be distributed and paid to the Debtor's pre- and post-petition lenders, First Chicago Equity Corporation and Four Partners (the "Lenders"), at the "Closing" (as defined in the Sale Motion at paragraph "25"). Any remaining Sale Proceeds after the Pre and Post Petition claims of the Lenders are satisfied in full shall be turned over to the Debtor's estate for distribution pursuant to a plan of liquidation or further order of this Court; and

3. Granting such other and further relief as may be just and proper; and it appearing from the Certificate of Service on file with this Court that proper notice of the Sale Motion has been provided; and the Auction Sale having been conducted before this Court on March 25, 2003; and a hearing on the Sale Motion having been held before this Court on March 25, 2003 (the "Sale Hearing") promptly after the conclusion of the Auction Sale; and no objections having been raised to the Sale Motion; and the final bid at the Auction Sale of the Successful Bidder, as defined herein (the "Purchase Price"), representing the highest and best offer received for the Acquired Assets; and upon the record of the Sale Hearing; and due deliberation having been had; and sufficient cause appearing therefor; NOW, it is hereby:

ORDERED, ADJUDGED, DETERMINED AND FOUND that:

1. Good and sufficient notice of the Sale Motion and of the Sale Hearing has been provided pursuant to Bankruptcy Rules 2002 and 6004 to those parties detailed in the Sale Motion, and any other requirement for notice be, and hereby is, dispensed with and waived.

2. The Lenders or their designee are the successful bidder ("Successful Bidder") for the Acquired Assets at a purchase price of \$625,000 (the "Purchase Price") as a credit bid of their secured claim pursuant to Section 363(k) of the Bankruptcy Code. The Successful Bidder is purchasing and the Debtor is selling and assigning the Acquired Assets in good faith, in an arms length transaction, pursuant to the terms and conditions of the Purchase Agreement, and, therefore, the sale and the parties thereto are entitled to the protections of section 363(m) of the Bankruptcy Code.

3. Based upon the record of the Sale Hearing and the recommendation of Arc International Corp., the Purchase Price for the Acquired Assets represents the highest and best offer received, is a fair and reasonable price and the Sale Motion is in the best interest of the Debtor's estate and its creditors and employees.

4. The Motion be and hereby is approved, and the Debtor hereby is authorized and empowered to assume, sell, transfer, lease, or assign the Acquired Assets to the Successful Bidder, in accordance with the terms and conditions contained therein and in this Order.

5. All requirements of section 105, 363(b), (f) and (m) and 365 of the Bankruptcy Code for the sale, assumption and assignment of the Acquired Assets to the Successful Bidder have been satisfied and sufficient circumstances and good business judgment exists in this case to justify approval of the Motion and the Proposed Sale and Assignment.

6. Pursuant to 11 U.S.C. § 363(f), the Acquired Assets are being sold and assigned, free and clear of any and all interests, liens, claims, debts, liabilities, obligations and encumbrances (including, without limitation, any mechanics' liens, security interests, financing statements and/or any claims arising under the Workers Adjustment Retraining and Notification Act, 29 U.S.C. §§ 2101, et seq. ("Workers' Claims")). Since the Purchase Price represents a credit bid pursuant to section 363(k) of the Bankruptcy Code, all other liens, claims, debts, liabilities, obligations, encumbrances and/or Workers' Claims will remain claims against the Debtor's other assets and shall not encumber the Acquired Assets. If the proposed sale fails to close for any reason, then such interests, liens, claims and encumbrances shall continue against the Acquired Assets unaffected by this Order.

7. The Successful Bidder shall not be deemed to have assumed or become liable for any liabilities, debts, claims or obligations of or against the Debtor of any kind or nature whatsoever, other than the non-refundable deposit (the "Deposit") as defined in paragraph 20 of the Sale Motion.

8. In the event the Successful Bidder does not complete the closing because of the Successful Bidder's default or because a condition to such closing has not been satisfied, then the Debtor is hereby authorized and empowered to retain the Deposit and accept the next highest bid submitted by a qualified bidder at the Auction Sale, who is ready, willing and able to close, or may hold an auction sale, without further order of the Court and the sale to such bidder shall be pursuant to the same terms, conditions and benefits contained in this order as if such bidder were the "Successful Bidder" hereunder.

9. In the event of default, the Lenders shall have standing and the right, but not the obligation, to enforce any of the Debtor's rights and remedies against the Successful Bidder or any third party, free of any restrictions contained in 11 U.S.C. §362.

10. This Court shall retain jurisdiction with regard to any and all disputes arising in connection with the relief authorized herein.
